<b>Eye contact (symptoms, special &amp; medical treatment):</b>	Mildly irritating following acute exposure. In case of contact with eyes, rinse immediately with water for a minimum of 15 minutes. If irritation persists seek medical advice.
<b>Skin Contact (symptoms, special &amp; medical treatment):</b>	Mildly irritating following acute exposure. In case of contact with skin, rinse immediately with plenty of soapy water, removed exposed clothing (if required). If irritation persists seek medical attention.
<b>Inhalation (symptoms, special &amp; medical treatment):</b>	Transient cough, shortness of breath following acute exposure. Treat as a mineral dust irritant to the respiratory tract. In case on inhalation to the respiratory tract, immediately extricate from exposed area. If irritation persists seek medical attention. Chronic overexposure can lead the chronic fibrosis of the lung, pneumoconiosis.
<b>Ingestion (symptoms, special &amp; medical treatment):</b>	Not an expected route of entry. In case of ingestion, immediately consume large amounts of water and induce vomiting. If irritation persists seek medical attention.
