**SECTION 2 – HAZARDS INFORMATION****GHS Classification of the chemical**

Not a dangerous substance or mixture according to the Globally Harmonised System (GHS).

**GHS Classification**

|                           |             |
|---------------------------|-------------|
| Mildly irritating to eyes | Category 2B |
| Acute Aquatic Toxicity    | Category 3  |
| Acute Toxicity, Oral      | Category 5  |
| Acute Toxicity Dermal     | Category 5  |

**GHS Label Elements**

|              |         |
|--------------|---------|
| Pictogram:   | None    |
| Signal Word: | Warning |

**Hazard Statements**

|      |                                      |
|------|--------------------------------------|
| H303 | Maybe harmful if swallowed.          |
| H320 | Causes eye irritation.               |
| H402 | Harmful to aquatic life.             |
| H313 | May be harmful in contact with skin. |

**Precautionary Statements****Prevention**

|      |                                                                            |
|------|----------------------------------------------------------------------------|
| P264 | Wash skin thoroughly after handling.                                       |
| P273 | Avoid release to the environment.                                          |
| P280 | Wear protective gloves/protective clothing/eye protection/face protection. |

**Response**

|                    |                                                                                                                                  |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------|
| P305 + P351 + P338 | IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. |
| P330               | Rinse mouth.                                                                                                                     |
| P337 + P313        | If eye irritation persists: Get medical advice/attention.                                                                        |
| P370 + P378        | In Case of Fire: Use dry sand, dry chemical, or alcohol-resistant foam for extinction.                                           |
| P391               | Collect spillage.                                                                                                                |

**Other Hazards**

None.

**SECTION 3 – COMPOSITION/INFORMATION ON INGREDIENTS****General Information:**

Fire fighting foam based on water soluble detergents.

| Chemical Name                                    | CAS Number  | Proportion |
|--------------------------------------------------|-------------|------------|
| Cocamidopropyl Betaine                           | 61789-40-0  | 0-5%       |
| Fluorocarbon surfactant                          | Proprietary | 5-10%      |
| Fatty acids, coco, compounds with diethanolamine | 61790-63-4  | 5-10%      |
| Sodium Laureth-5 Sulfate                         | 9004-82-4   | 5-10%      |
| Dipropylene glycol, monomethyl                   | 34590-94-8  | 10-15%     |
| Water                                            | 7732-18-5   | 70-85%     |

**SECTION 4 – FIRST AID MEASURES**

|                                 |                                                                                                                                                                                                                                                                                                                           |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>If Inhaled:</b>              | Remove promptly to fresh air. If respiratory irritation, dizziness, nausea, unconsciousness occurs, seek medical attention. Treat unconsciousness by placing the person in the coma position. Apply artificial respiration if breathing stops.                                                                            |
| <b>In case of Skin Contact:</b> | Wash off with soap and plenty of water. Seek medical attention if irritation persists.                                                                                                                                                                                                                                    |
| <b>In case of Eye Contact:</b>  | Flush eye with water for a minimum of 15 minutes, keep moving eyes to ensure complete flushing. Seek medical attention promptly if irritation persists or loss of vision occurs.                                                                                                                                          |
| <b>If Swallowed:</b>            | Never give anything by mouth to an unconscious person. Rinse mouth with water and if conscious, dilute stomach contents by giving large amounts of Water. Seek medical attention. Do not attempt to induce vomiting or give anything by mouth to an unconscious person. Resuscitate if the subject has stopped breathing. |

**Most important symptoms and effects, both acute and delayed**

The most important known symptoms and effects are described in the labelling (see section 2.2) and/or in section 11.

**Indication of any immediate medical attention and special treatment needed.**

No data available.

**SECTION 5 – FIRE FIGHTING MEASURES**

|                                                                |                                                                                            |
|----------------------------------------------------------------|--------------------------------------------------------------------------------------------|
| <b>Extinguishing Media:</b>                                    | Use water fog (or if unavailable, fine water spray), dry chemical, carbon dioxide or foam. |
| <b>Specific hazards arising from the substance or mixture:</b> | Burning can produce carbon monoxide and/or carbon dioxide.                                 |

|                                 |                                                                                                                                                                                                                                                                                                                                                                             |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Advice for Firefighters:</b> | Use water to cool exposed containers. If safe to do so, remove containers from path of fire. For major fires or where atmosphere is Oxygen deficient or contains unacceptable levels of combustion products, firefighters must wear self-contained breathing apparatus with full-face mask and protective clothing. Prevent spillage from entering drains or water courses. |
| <b>Further Information:</b>     | No data available.                                                                                                                                                                                                                                                                                                                                                          |

## SECTION 6 – ACCIDENTAL RELEASE MEASURES

|                                                                             |                                                                                                                                                                                                                             |
|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Personal precautions, protective equipment and emergency procedures:</b> | Avoid breathing vapors, mist or gas. For personal protection see section 8.                                                                                                                                                 |
| <b>Environmental precautions:</b>                                           | Do not let product enter drains.                                                                                                                                                                                            |
| <b>Methods and materials for containment and cleaning up:</b>               | Contain and recover product when possible. Collect product in an appropriate container and place in a chemical waste container. Collected empty containers can be disposed of through local council waste removal services. |
| <b>Reference to other sections:</b>                                         | For disposal see section 13.                                                                                                                                                                                                |

## SECTION 7 – HANDLING AND STORAGE

### Precautions for Safe Handling

|                                                                      |                                                                                                                                                                                                                                                                       |
|----------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Precautions for Safe Handling:</b>                                | Protect against physical damage. Make certain the containers are well sealed when not in use.                                                                                                                                                                         |
| <b>Conditions for Safe Storage, including any incompatibilities:</b> | Store in a cool, dry well ventilated location. Keep containers closed at all times. Not to be stored with explosives, flammable gases in bulk, poisonous gasses, spontaneously combustible substances, oxidizing agents, organic peroxides or radioactive substances. |
| <b>Specific End Uses:</b>                                            | Apart from the uses mentioned in section 1 no other specific.                                                                                                                                                                                                         |
| <b>Reference to other sections:</b>                                  | Not applicable.                                                                                                                                                                                                                                                       |

## SECTION 8 – EXPOSURE CONTROLS, PERSONAL PROTECTION

### Control Parameters

### National Exposure Standards

| Standard Name                  | CAS No     | TWA (ppm) | TWA (mg/m <sup>3</sup> ) |
|--------------------------------|------------|-----------|--------------------------|
| Dipropylene glycol, monomethyl | 34590-94-8 | 50        | 308                      |

Sk Absorption through the skin may be significant source of exposure.

No Exposure Standards have been assigned by the National Occupational Health and Safety Commission for other components of this product at the use levels.

|                                    |                                                                                                                                                                                                                                                                                                                                      |
|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Exposure Controls:</b>          | Appropriate engineering controls. General industrial hygiene practice.                                                                                                                                                                                                                                                               |
| <b>Respiratory Protection:</b>     | Respiratory protection is not required for the diluted product or when handling concentrate. If necessary use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).                                                                                                  |
| <b>Skin Protection:</b>            | Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices.<br>Wash and dry hands. Protective gloves. |
| <b>Body Protection:</b>            | Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and specific to the workplace. The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.                                            |
| <b>Eye/Face Protection:</b>        | Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU).                                                                                                                                                                                                        |
| <b>Other protective equipment:</b> | None                                                                                                                                                                                                                                                                                                                                 |

## SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES

### Information on basic physical and chemical properties

|                                                   |                                                            |
|---------------------------------------------------|------------------------------------------------------------|
| <b>Appearance:</b>                                | Clear water white to light yellow medium viscosity liquid. |
| <b>Odour:</b>                                     | Slight glycol.                                             |
| <b>Boiling Point:</b>                             | 100°C                                                      |
| <b>Solubility in Water:</b>                       | Completely soluble.                                        |
| <b>Specific Gravity:<br/>(H<sub>2</sub>O = 1)</b> | 1.026 @ 20°C                                               |
| <b>Physical State:</b>                            | Liquid.                                                    |
| <b>pH:</b>                                        | 7.5 @ 20°C                                                 |
| <b>Flash Point:</b>                               | Non flammable.                                             |
| <b>Flammability:</b>                              | Non flammable.                                             |
| <b>Flammable Limits LEL:</b>                      | Non flammable.                                             |
| <b>Flammable Limits UEL:</b>                      | Non flammable.                                             |

## SECTION 10 – STABILITY AND REACTIVITY

|                                |                                         |
|--------------------------------|-----------------------------------------|
| <b>Reactivity:</b>             | Data not available.                     |
| <b>Chemical stability:</b>     | Stable under normal storage conditions. |
| <b>Conditions to Avoid:</b>    | Data not available.                     |
| <b>Incompatible materials:</b> | Strong oxidizing agents.                |

|                                          |                                                          |
|------------------------------------------|----------------------------------------------------------|
| <b>Hazardous decomposition products:</b> | Data not available. In the event of fire: see section 5. |
|------------------------------------------|----------------------------------------------------------|

## SECTION 11 – TOXICOLOGICAL INFORMATION

### Information on Toxicological Effects

|                                                                   |                                                                                                                                                                                                                                                                                       |
|-------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Acute toxicity:</b>                                            | No data available.<br>Not a likely source of exposure, however, moderate quantities of concentrate may cause irritation. Potential symptoms include nausea, diarrhea, abdominal pain and vomiting.                                                                                    |
| <b>Inhalation:</b>                                                | No data available.<br>Ingredients are considered non-hazardous when used as directed.                                                                                                                                                                                                 |
| <b>Skin Corrosion/Irritation:</b>                                 | No data available.<br>May cause skin irritation if prolonged contact with the concentration occurs, which can result in redness, itchiness, swelling and possibly lead to dermatitis. Continual exposure to dilute solutions will cause loss of natural skin oils and drying of skin. |
| <b>Serious Eye Damage/Eye Irritation:</b>                         | No data available.<br>The concentrate is considered an eye irritant. May cause eye soreness.                                                                                                                                                                                          |
| <b>Respiratory or Skin Sensitization:</b>                         | No data available.                                                                                                                                                                                                                                                                    |
| <b>Germ cell mutagenicity:</b>                                    | No data available.                                                                                                                                                                                                                                                                    |
| <b>Carcinogenicity:</b>                                           | IARC: No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.                                                                                                                         |
| <b>Reproductive toxicity:</b>                                     | No data available.                                                                                                                                                                                                                                                                    |
| <b>Specific Target Organ Toxicity (STOT) – single exposure:</b>   | No data available.                                                                                                                                                                                                                                                                    |
| <b>Specific Organ Target Toxicity (STOT) – repeated exposure:</b> | No data available.                                                                                                                                                                                                                                                                    |
| <b>Aspiration Hazard:</b>                                         | No data available.                                                                                                                                                                                                                                                                    |
| <b>Additional Information:</b>                                    | RTECS: Not available. To the best of our knowledge, the chemical, physical and toxicological properties have not been thoroughly investigated.                                                                                                                                        |

## SECTION 12 – ECOLOGICAL INFORMATION

|                                       |                                                                                                              |
|---------------------------------------|--------------------------------------------------------------------------------------------------------------|
| <b>Toxicity:</b>                      | No data available.<br>Harmful to aquatic life when diluted and in concentrate form. Not harmful to birdlife. |
| <b>Persistence and Degradability:</b> | No data available.                                                                                           |
| <b>Bioaccumulative Potential:</b>     | No data available.                                                                                           |
| <b>Mobility in Soil:</b>              | No data available.                                                                                           |

| <b>Other adverse effects:</b>              | No data available                                                                           |

### SECTION 13 – DISPOSAL CONSIDERATIONS

#### Waste Treatment Methods

|                                |                                                                                                                                                                                              |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Product</b>                 | Collect residue for recovery, recycling or as waste material. Product must not be disposed of to the sewerage system, drains or waterways.                                                   |
| <b>Contaminated Packaging:</b> | Dispose of container and unused contents in accordance with federal, state and local requirements. Empty container and lid can be recycled as per local council waste recycling regulations. |

### SECTION 14 – TRANSPORT INFORMATION

|                                       |                            |
|---------------------------------------|----------------------------|
| <b>UN Number:</b>                     | Not applicable.            |
| <b>UN Proper Shipping Name:</b>       | <b>Not Dangerous Goods</b> |
| <b>Transport Hazardous Class(es):</b> | Not applicable.            |
| <b>Packaging Group:</b>               | Not applicable.            |
| <b>Environmental Hazards:</b>         | Not applicable.            |
| <b>Special Precautions for User:</b>  | Not data available.        |

### SECTION 15 – REGULATORY INFORMATION

#### Safety, health and environmental regulations / legislation for the substance or mixture

#### Standard for the Uniform Scheduling of Medicines and Poisons

No data available.

#### Carcinogen Classification under WHS Regulation 2011, Schedule 10

Not listed.

#### Notification Status

AICS: On the inventory, or in compliance with the inventory.

DSL: All components of this product are on the Canadian DSL.

ENCS: On the inventory, or in compliance with the inventory.

NZIoC: On the inventory, or in compliance with the inventory.
