SIRENS HAND HELD

Product Information

SHHP – Plastic

SHH - Alloy

The **SHH** (alloy construction) and the **SHHP** (plastic construction) are a low cost, light hand held siren **perfect for use in office, school, domestic, camping/hiking and marine applications**. When the handle is wound the siren makes a typical “air raid” style sound, lower pitch if rotated slower and higher if rotated faster with a **finger control for volume control**.

The hand wound operation means that siren is always ready for use: requires no batteries or electrical power. The operation is simple with little or no training required.

Cast aluminium and moulded plastic versions which are available to suit the requirements of robustness for heavy or light use or weight for ease of carrying and for smaller users such as children.

Rated 105-110dB @ 1mt
Weights 0.7Kg Plastic & 1.2Kg Alloy
